ENDA MCGOLDRICK

IT Support Engineer | Microsoft 365 · Intune · Entra ID · Endpoint Security

mcgoldrickenda@gmail.com | linkedin.com/in/enda-mcgoldrick | Relocating to Stockholm · EU citizen

PROFESSIONAL SUMMARY

IT Support Engineer with 4+ years across AWS data centre operations and Microsoft 365 administration. At Vastint, delivered 2nd/3rd line support for 240-280 employees in 10 European offices, managing Entra ID, Intune, Autopilot and Microsoft Defender. Cleared an AWS ticket backlog in four months and used data to lift exam pass rates from around 50% to 80%+. CompTIA Security+ certified, with a BSc in Software Development and a Professional Diploma in Cybersecurity (Distinction).

TECHNICAL SKILLS

- **Microsoft 365:** Exchange Online, SharePoint Online, OneDrive, Teams, Microsoft 365 Copilot, M365 governance
- **Identity & Access:** Microsoft Entra ID, user lifecycle (joiners/movers/leavers), licensing, permissions, access management
- **Endpoint Management:** Microsoft Intune, Windows Autopilot, device provisioning, configuration and compliance policies
- **Security:** Microsoft Defender, endpoint security policies, access controls, secure media sanitisation
- **Infrastructure:** Data centre operations, server and rack hardware, UPS and power maintenance, network troubleshooting
- **Service Management:** 2nd/3rd line support, incident management, ticketing systems, vendor management, IT asset management, technical documentation

CERTIFICATIONS

- **CompTIA Security+** (issued Apr 2024, valid to Apr 2027)

WORK EXPERIENCE

IT Support Engineer | Vastint | Amsterdam, Netherlands AUG 2024 · OCT 2026

- Resolved complex 2nd and 3rd line incidents across hardware, software, endpoints, networks and Microsoft 365 for 240-280 employees and hundreds of external and guest users across 10 offices and 13 entities in Europe.
- Administered the Microsoft 365 estate (Teams, SharePoint Online, OneDrive, Exchange Online and Copilot) and was a key point of contact for Microsoft 365 and Copilot governance.
- Managed the full identity lifecycle in Microsoft Entra ID: onboarding and offboarding, licensing, permissions and access.
- Provisioned ready-to-work laptops through Microsoft Intune and Windows Autopilot, creating new device policies and updating existing ones for configuration and compliance.
- Responded to Microsoft Defender security alerts, following up with affected users and fixing the cause, from updating out-of-date software to resetting credentials after phishing campaigns.
- Worked with the IT team to standardise IT across 13 entities that each had their own external IT vendor, rolling out a shared ticketing system, onboarding and offboarding checklists, common software and documented processes for vendors to follow.
- Managed software licensing, procurement, renewals and vendor relationships.

Data Center Engineer | Wipro | Dublin, Ireland JUL 2023 · AUG 2024

- Ran the Dublin office server room as its sole on-site engineer, carrying out routine checks on power, UPS, cooling and hardware alarms and raising faults through the ticketing system.
- Provided remote hands for remote infrastructure teams, rebooting equipment, swapping parts and checking cabling and hardware on request, then closing out the tickets.
- Coordinated the office UPS replacement as primary on-site contact: joined technical bridge calls, managed electrical and infrastructure vendors and their server-room access, ran the controlled shutdown and restart, and tested every system afterwards.
- Audited the full server-room environment (infrastructure setup, server configurations and hardware specifications) and brought the technical records up to date.

Data Center Technician | Amazon Web Services (AWS) | Dublin, Ireland APR 2022 · JUL 2023

- Cleared a significant media-ticket backlog in about four months during a six-month transfer to Data Center Operations, improving the team's operational metrics.
- Trained more than 20 colleagues as Media Auditors, covering secure media destruction, equipment operation, ticket triage and handling procedures.
- Isolated, wiped and safely powered down network switches and hosts during rack migrations with cross-functional teams, keeping tickets accurate throughout.
- Diagnosed hardware faults and replaced components to restore equipment and minimise service disruption.
- Decommissioned and destroyed customer storage media to data sanitisation standards, keeping equipment inventories and asset records accurate.

Senior Qualification Specialist | TELUS Digital AI Data Solutions | Mayo, Ireland JAN 2016 · APR 2022

Prepared newly recruited contractors on search-quality and AI projects for major tech clients to pass each client's qualification exam.

- Analysed candidates' exam results to find the questions and topics they were failing on, and built reports showing the team where to focus training; on most projects, pass rates rose from around 50% to 80% or higher.
- Reviewed training materials against those findings and updated them where candidates kept falling down.
- Onboarded and trained the team's new starters as it grew from a single member to eight, remaining its most senior member throughout.
- Served as subject matter expert and the team's main point of contact with wider business teams, coaching colleagues on project and client requirements.

EDUCATION

Professional Diploma in Cybersecurity | University College Dublin · Grade: Distinction MAY 2023 · SEP 2023

BSc (Hons) Software Development | Atlantic Technological University, Sligo · Grade: 2.1 AUG 2013 · MAR 2016
