ENDA MCGOLDRICK

IT Support Engineer | Microsoft 365 · Intune · Entra ID · Endpoint Security

mcgoldrickenda@gmail.com | linkedin.com/in/enda-mcgoldrick | Relocating to Stockholm · EU citizen

PROFESSIONAL SUMMARY

IT Support Engineer with 4+ years spanning hyperscale data centre operations at AWS and enterprise Microsoft 365 administration. Most recently delivered 2nd/3rd line support for 240-280 employees and hundreds of external and guest users across Vastint's 10 European offices, managing Entra ID identities, Intune and Autopilot device provisioning, Microsoft Defender security policies and Microsoft 365 governance. Experienced in cutting ticket backlogs, coordinating critical infrastructure maintenance and standardising IT services across multiple countries. CompTIA Security+ certified, with a BSc in Software Development and a Professional Diploma in Cybersecurity (Distinction).

TECHNICAL SKILLS

- **Microsoft 365:** Exchange Online, SharePoint Online, OneDrive, Teams, Microsoft 365 Copilot, M365 governance
- **Identity & Access:** Microsoft Entra ID, user lifecycle (joiners/movers/leavers), licensing, permissions, access management
- **Endpoint Management:** Microsoft Intune, Windows Autopilot, device provisioning, configuration and compliance policies
- **Security:** Microsoft Defender, endpoint security policies, access controls, secure media sanitisation
- **Infrastructure:** Data centre operations, server and rack hardware, UPS and power maintenance, network troubleshooting
- **Service Management:** 2nd/3rd line support, incident management, ticketing systems, vendor management, IT asset management, technical documentation

CERTIFICATIONS

- **CompTIA Security+** (issued Apr 2024, valid to Apr 2027)

WORK EXPERIENCE

IT Support Engineer | Vastint | Amsterdam, Netherlands AUG 2024 · OCT 2026

- Resolved complex 2nd and 3rd line incidents across hardware, software, endpoints, networks and Microsoft 365 for 240-280 employees and hundreds of external and guest users across 10 offices and 13 entities in Europe.
- Administered the Microsoft 365 estate (Teams, SharePoint Online, OneDrive, Exchange Online and Copilot) and acted as a key point of contact for Microsoft 365 governance.
- Managed the full identity lifecycle in Microsoft Entra ID, including onboarding and offboarding, licensing, permissions and access management.
- Delivered ready-to-work devices through Microsoft Intune and Windows Autopilot, handling provisioning, configuration and compliance.
- Strengthened security posture by supporting Microsoft Defender, access controls and endpoint security policies across the organisation.
- Helped centralise and standardise IT services and support processes across European offices, improving consistency and operational efficiency.
- Supported migration and modernisation projects, including SharePoint and file-storage consolidation and the move to cloud-based, modern workplace tools.
- Managed software licensing, procurement, renewals and vendor relationships, keeping IT documentation and support procedures accurate and current.
- Partnered with internal stakeholders and external IT service providers to resolve complex technical issues and deliver IT projects.

Data Center Engineer | Wipro | Dublin, Ireland JUL 2023 · AUG 2024

- Maintained the availability and service continuity of the Dublin office's server-room infrastructure.
- Served as the office's primary point of contact for a UPS replacement project, joining technical bridge calls and coordinating electrical and infrastructure vendors.
- Managed vendor access to the server room and supported the controlled shutdown and restart of IT equipment, then ran post-maintenance testing to confirm all systems and services were operational.
- Carried out a full audit of the server-room environment, documenting infrastructure setup, server configurations and hardware specifications, and brought technical records up to date.

Data Center Technician | Amazon Web Services (AWS) | Dublin, Ireland APR 2022 · JUL 2023

- Transferred to Data Center Operations for six months to tackle a significant backlog of media tickets and improve operational metrics.
- Trained team members as Media Auditors, covering secure media destruction, equipment operation, ticket triage and handling procedures.
- Supported rack migrations with cross-functional teams, isolating, wiping and safely powering down network switches and hosts while keeping tickets accurate.
- Diagnosed hardware faults and replaced components to restore equipment and minimise service disruption.
- Securely decommissioned and destroyed customer storage media in line with data sanitisation and security procedures.
- Kept equipment inventories accurate through asset management, ticketing systems and technical documentation.

Senior Qualification Specialist | TELUS Digital AI Data Solutions | Mayo, Ireland JAN 2016 · APR 2022

- Became the team's first and most senior member, onboarding and training new employees across multiple projects and workflows.
- Developed and refined training materials, making onboarding more consistent and effective.
- Analysed project data and performance metrics to spot issues, monitor trends and drive process improvements.
- Acted as subject matter expert and main liaison between the team and wider business teams, coaching colleagues and upholding quality standards.

EDUCATION

Professional Diploma in Cybersecurity | University College Dublin · Grade: Distinction MAY 2023 · SEP 2023

BSc (Hons) Software Development | Atlantic Technological University, Sligo · Grade: 2.1 AUG 2013 · MAR 2016
