Enda McGoldrick

IT Support Engineer | Microsoft 365 · Intune · Entra ID · Endpoint Security

mcgoldrickenda@gmail.com | linkedin.com/in/enda-mcgoldrick

Professional Summary

IT Support Engineer with 4+ years in IT infrastructure and support, from AWS hyperscale data centres to 2nd/3rd line Microsoft 365 administration across multiple European offices. Hands-on with Microsoft Entra ID, Intune, Autopilot, Exchange Online, SharePoint Online and Microsoft Defender. Track record of standardising IT processes, delivering migration projects and reducing ticket backlogs. BSc in Software Development and a Professional Diploma in Cybersecurity (Distinction).

Technical Skills

- **Microsoft 365:** Exchange Online, SharePoint Online, OneDrive, Teams, Microsoft 365 Copilot, M365 governance
- **Identity & Access:** Microsoft Entra ID, user lifecycle (joiners/movers/leavers), licensing, permissions, access management
- **Endpoint Management:** Microsoft Intune, Windows Autopilot, device provisioning, configuration and compliance policies
- **Security:** Microsoft Defender, endpoint security policies, access controls, secure media sanitisation
- **Infrastructure:** Data centre operations, server and rack hardware, UPS and power maintenance, network troubleshooting
- **Service Management:** 2nd/3rd line support, incident management, ticketing systems, vendor management, IT asset management, technical documentation

Work Experience

IT Support Engineer | Vastint | Amsterdam, Netherlands | Aug 2024 – Oct 2026

- Resolved escalated 2nd/3rd line incidents across hardware, software, network, endpoint and Microsoft 365 for multiple European offices.
- Streamlined onboarding and strengthened security by provisioning devices via Autopilot and Intune with Defender and compliance policies.
- Kept access secure by managing Entra ID identities, licensing and permissions through standardised joiner/mover/leaver processes.
- Moved teams off legacy file shares by supporting consolidation into SharePoint Online and OneDrive.
- Improved consistency across offices by helping centralise IT support processes and documentation.
- Controlled software costs by managing licensing, renewals and vendors; key contact for Microsoft 365 and Copilot governance.

Data Center Engineer | Wipro | Dublin, Ireland | Jul 2023 – Aug 2024

- Delivered a safe UPS replacement as the Dublin office's primary contact, coordinating electrical and infrastructure vendors and running controlled shutdown, restart and post-maintenance validation of IT systems.
- Improved the accuracy of infrastructure records by auditing the server room (configurations, hardware specifications, equipment) and updating technical documentation.

Data Center Technician | Amazon Web Services (AWS) | Dublin, Ireland | Apr 2022 – Jul 2023

- Cut a significant media-ticket backlog and improved team metrics during a six-month secondment to Data Center Operations.
- Trained team members as Media Auditors in secure media destruction, equipment operation and ticket triage.
- Supported rack migrations with cross-functional teams, safely isolating, wiping and powering down switches and hosts.
- Minimised downtime through hardware fault diagnosis and repair, and decommissioned storage media to data sanitisation standards.

Senior Qualification Specialist | TELUS Digital AI Data Solutions | Mayo, Ireland | Jan 2016 – Apr 2022

- Made onboarding more consistent as the team's first and most senior member, training new staff and building training materials.
- Drove process improvements as subject matter expert by analysing project data and performance metrics.

Education

Professional Diploma in Cybersecurity (Distinction) | University College Dublin | 2023

BSc (Hons) Software Development (2.1) | Atlantic Technological University, Sligo | 2016
